

## List of Tables

Table 2-1: KAT-7 main assembly descriptions (BAE Systems Dynamics, 2010)	6
Table 3-1: KAT-7 performance requirements (SKA Africa, 2008:24-25)	26
Table 3-2: Elevation mechanism descriptions	27
Table 3-3: Fixed and variable lengths and angles	30
Table 3-4: KAT-7 Antenna Control Unit	54
Table 3-5: Assembly part descriptions for steps one, two and three	58
Table 3-6: Assembly part descriptions for steps four, five and six	59
Table 3-7: Raceway and indenter assembly descriptions	63
Table 4-1: Spectrometric analysis results of the ball screw spindle	68
Table 4-2: Vickers hardness results of spindle	69
Table 4-3: Spectrometric analysis results of the ball screw nut	71
Table 4-4: Vickers hardness analysis of the nut	72
Table 4-5: Chemical analysis results of the ball screw ball bearings	73
Table 4-6: Vickers hardness results of ball bearings	74
Table 4-7: Ball screw materials physical and mechanical properties	75
Table 4-8: Load case scenarios	76
Table 4-9: Force $F_0$ results of load case scenario five	92
Table 4-10: Compression test data and numerical model data results summary	97
Table B-1: SANS Hydraulic Universal Testing Machine	115
Table C-1: Force, $F_0$ , and, $F_a$ , results of load case scenario one	118
Table C-2: Force, $F_0$ , and, $F_a$ , results of load case scenario two	119
Table C-3: Force, $F_0$ , results of load case scenario three	120
Table C-4: Accumulated rain water mass results of load case scenario three	121
Table C-5: Force, $F_0$ , results of load case scenario four	122
Table C-6: Accumulated rain water mass results of load case scenario four	123
Table C-7: Weighted percentage error for the compression test data and numerical model data	124
